

ANTI - MOVING LINE

CODE	MAIN DIMENSIONS						DYNAMIC LOAD Lbs.	STATIC LOAD Lbs.
	D	D1	F		G MIN-MAX	H		
14000	140	125	M12	8	60-66	110	2135	4380
14010	160	145	M16	10	60-66	133	3145	6515

Anti-vibration mounts have been designed to solve the problems of a tangential acceleration which may cause unbalance in the distribution of the weight on the bearing points of the machine.

Material: galvanized steel base C40

Pad: rubber NBR 90 shore

Load values mentioned above refer to static conditions calculated at half of the screw length. In conditions of vibrations or in presence of dynamic loads these values should be reduced. We cannot accept responsibility for mounts that have been tampered or modified.
